

YOUR PARTNER FOR SECURE PHARMACEUTICAL SHIPMENTS

Powered by cutting-edge reefer technology, MSC ensures that your products are transported in optimal conditions, safeguarding their quality throughout the journey. Our experts are available to provide you with the very best service and equipment to meet the requirements of your supply chain.

A COMPREHENSIVE PORTFOLIO OF SOLUTIONS

With decades of experience in transporting pharmaceutical products across the world, MSC offers a comprehensive portfolio of transport and logistics solutions, as well as additional services, to serve the pharmaceutical industry.

GLOBAL COVERAGE

Our global network connects the world, offering direct calls to key markets

OVER 1,000 EXPERTS

Our reefer specialists are always available

DEDICATED CUSTOMER SERVICE

Deep knowledge of the pharma industry, pre-trip inspection and cargo monitoring

REEFER FLEET

Our world-leading fleet features reefer containers equipped with the most efficient & environmentally-friendly refrigeration units (Natura Line Prime Line)

REEFER CONTAINER AVAILABILITY

Your pharmaceuticals can be transported in 20' reefers or 40' high cube reefers, equipped with latest cooling technology

DOOR-TO-DOOR SOLUTIONS

MSC provides a selection of additional solutions, such as intermodal transportation, customs clearance and warehousing for a seamless journey from start to finish

MARINE CARGO INSURANCE

Select our cargo cover solution to avoid financial losses in case of unforeseen events. For the partial or full value of your cargo. Simple and fast-tracked claim's resolution process

GDP-COMPLIANT TRANSPORT SOLUTION

You can opt for a GDP-compliant protocol that adheres to the strict quality standards set by the European Commission.

OPT FOR A GDP-COMPLIANT TRANSPORT SOLUTION

As a certified carrier, we observe strict security procedures, pre-trip inspections, temperature checks, CAPA, traceability tests and much more, as required by GDP standards.

CONTROL TOWER AND CAPA MANAGEMENT

- 24/7 live monitor of connected units and constant follow up on vendor's services
- Fast response on alarms and incidents
- Management of CAPA and reporting.

OPRP PROGRAM

- Operational pre-requisite procedure for GDP-dedicated containers
- Dedicated set of procedures for the maintenance and readiness of a fleet of GDP-suitable containers.

EQUIPMENT QUALIFICATION PROTOCOL

- Processes for reinforced protocols for probes calibration and containers' mapping (winter/summer mapping; full/empty; with/without thermal blanket)
- GDP OPRP validated and audited on the entire network
- Connected unit option and connected vessel opportunity.

RISK MANAGEMENT APPROACH

- Risk matrix validation and continuous improvement approach
- Spare parts availability on terminal and on vessels within the GDP quality protocol
- Security measures on land and sea to minimize contamination's risks
- Seal management procedures monitoring distributions/application and monitoring
- Minimum equipment handling, reducing handing impact the power interruption to the GDP units
- Vendor homologation program dedicated to the identification of GDP containers and dedicated specific services.

HIGHEST COMMITMENT ON QUALITY AND CONTINUOUS IMPROVEMENT

- Adoption of quality principles within multiple standards: ISO 9001; ISO 14001; ISO 45001; ISO 28000; ISO 27001; ISO 22301; ISO 22000 and GDP2013 and GDP 2015
- Global training on GDP relevance awareness and specific procedures on matter of: hygiene rules, GDP container cleaning, heater check-out; GDP sensor calibration; GDP full reefer monitoring; environmental care and waste Management.
